A Decade of R&D and Expertise...

After years of research and development, we've taken refrigerant identification to the next level and set the standard for performance, accuracy and portability.

The Neutronics *Ultima ID™* Refrigerant Identifier is the most advanced A/C service tool on the market. It's smarter, faster, and more portable than any refrigerant identifier you've ever used.

Features and Benefits...

- Built-in printer for easy customer billing*
- Exceptionally portable design – goes anywhere you need to go
- Built-in rechargeable power pack* and car battery clips
- Identifies EPA S.N.A.P. approved blends
- Large graphic display for easy reading
- Ultra fast test time

Each Ultima ID Includes...

- (1) *Ultima ID* Base Unit
 - (1) Molded Carrying / Storage Case
 - (1) R12 Sample Hose
 - (1) R134a Sample Hose
 - (1) R134a Tank Adapter
 - Operating Instructions
 - Warranty registration Card
- * optional feature

Create a Customer Receipt with the Optional, Built-In Printer!

The Neutronics *Ultima ID* Refrigerant Identifier is also available with an optional factory installed printer module, Model No. RI-2004DXP, which helps you to pass the service cost along to your customers. *Ultima ID* can produce an on the spot receipt, which you can attach to your customers work order and get paid for it!

New Profit Opportunity...

Refrigerant identification is an important service that you should get paid for. The all-new *Ultima ID* makes it easier than ever to profit from this important service.

Look at the ROI...

An average shop can bank on at least 10 A/C services per week during the summer season. At just \$10.00 per test, that's an extra \$1,600 in profit with the new *Ultima ID*.

Ultima ID is part of the full line of Neutronics Automotive Service Products:
