FAQ's

Why does my Identifier show "0%" for all the refrigerant and 95 % air?

The Neutronics identifiers are designed to measure refrigerants using the pressure from the system or cylinder to provide a sample of the refrigerant. When the system or cylinder is virtually empty, there is not enough pressure to "push" a suitable sample through the unit. High air concentrations often indicate a very low charge condition or a problem with the low side service port.

Why can't I use my Ultima ID while the battery charger is plugged in?

When the battery charger is plugged in, the Ultima ID automatically isolates the battery from the rest of the unit. In order to use the Ultima ID while the battery is charging, simply connect the supplied 12VDC power clips to your Ultima ID.

Neutronics offers an A/C power cube specifically for the Ultima ID.

P/N 6-01-6001-13-0 will power your Ultima ID from any 100-240 VAC source.

Neutronics Announces Ultima ID Trade-Up Program

Neutronics Automotive is pleased to announce our customer loyalty Trade-Up program offering fantastic trade in value for your existing Neutronics Refrigerant Identifier.

A/C season is now moving at full speed and the Neutronics Automotive Team is pleased to offer our existing users an exceptional opportunity to Trade-In their current refrigerant identifier for a brand new Ultima ID Refrigerant Identifier at an unbelievable price.

The **ALL-NEW** Ultima ID™ Refrigerant Identifier is just like having a cash machine in every service bay! We've taken our 10+ years of refrigerant identification experience and combined it with years of technician and shop owner input to make the **Ultimate** Refrigerant Identifier.

With the Ultima ID, you can print the test results for every car and get paid for it!

"Refrigerant identification is a service that protects you and your customers so get paid for it!"

Check out these *Ultimate* Features:

- **12 VDC Power!** No more hunting for an A/C outlet, just connect to the vehicle battery.
- **Blend ID,** alerts you when the Ultima ID finds an illegally installed blend refrigerant.
- **Built In Printer** Option, creates a printout of the test results to increase customer confidence and make billing for this important test easy and convenient.
- **Ultra Fast Test Time!** Turn on the Ultima ID and have a printout in as little as 70 seconds.
- **Fender Friendly Ergonomic Design** with protective rubber hand grips to protect the vehicle.
- **Large, LCD Graphic Display** with easy to read instructions and easy to use soft keys.
- **Rugged Storage Case** with space for an extra battery, battery charger, hoses and more.
- **Optional, Internal, Rechargeable Battery Pack** Don't have 12 VDC or can't get to the battery under all that underhood plastic? No problem! Run up to 50 test without any power cords.
- **Optional, 115/230 VAC Power Cube** powers your new Ultima ID from any wall outlet for those users who prefer the ease of AC power.

The All-New Ultima ID from Neutronics includes a Built-In Printer (RI-2004DXP) for easy service billing.
